

ArtCenter College of Design

The Peter and Merle Mullin Gallery

Details of Design: Beauty, Aerodynamics and Functionalism

Streamlining the driving experience

October 26, 2018 through October 2019

Details of Design features vehicles from the Mullin Automotive Museum Collection and other private collectors and organizations from throughout Southern California. The exhibit was curated and organized by The Scenic Route under the guidance of Peter Mullin. The cars on display prompt visitors to examine the work and methods of six automobile designers, or design teams, who created streamlined vehicles from the 1920s to today. This global selection of designers, which includes ArtCenter alumni, was chosen for their significant contributions to automotive styling. Together, Paul Jaray, Gabriel Voisin, Joseph Figoni, Peter Brock, Frank Stephenson and Art Center alumni from the Faraday Future design team reveal key aspects of the evolution of transportation design and anticipate how automobile styling will be augmented in our future.

Vehicles:

The gallery will feature six vehicles on permanent display and four additional vehicles from the Mullin Automotive Museum Collection during the opening celebration.

1. 1935 Voisin Type C25 Aérodyne
Coachwork designed by Gabriel Voisin
